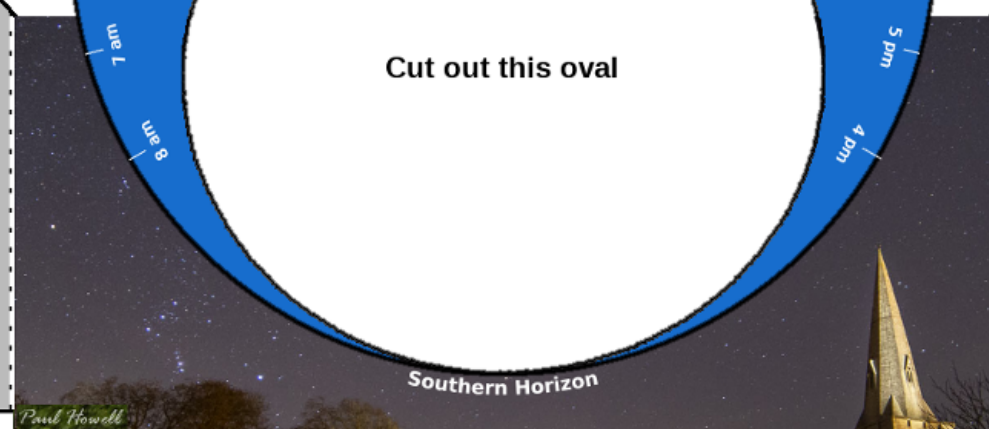
Southern Horizon

Cut out this oval



To use the planisphere:

1. Rotate the star disc to align the time and date.
2. Rotate the planisphere so that the direction you are looking is at the bottom of the horizon oval.
3. Lift the planisphere over your head and the white area will show you the brightest stars in the sky.

Star disc created with Guide v9.1 from www.projectpluto.com

Cut out around the solid lines

Fold the side and bottom flaps back along the dotted lines and glue them to form a pocket for the star disc
